

SMART ATTENDANCE • SECURE IDENTITY • REAL-TIME INTELLIGENCE

Cloud-Based Contactless Biometric Attendance Management System

Powered by Facial Recognition and RFID Technology

Presented by Massive Global Info

About Massive Global Info

We build practical digital tools that help organizations run more smoothly — automating everyday tasks, improving accuracy, and giving leaders clear, real-time visibility into how their teams operate.

CORE SERVICES

Software Development

Custom systems built around how your business works

Web Applications

Fast, secure platforms your team can access anywhere

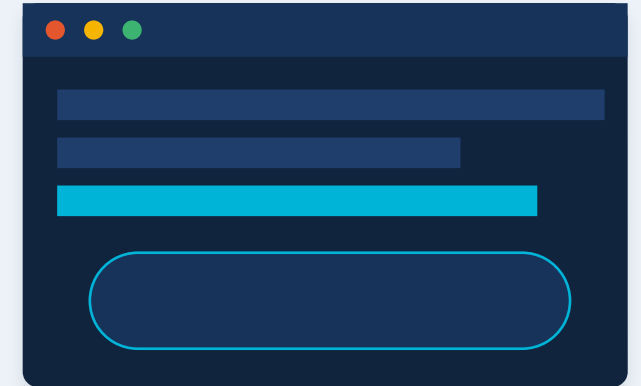

Mobile Applications

Attendance and operations, right in your pocket

Cloud Solutions

Reliable infrastructure that scales as you grow

“Delivering Digital Excellence”

A team focused on one thing: making your operations simpler and smarter.

Why Paper-Based Attendance Is Holding You Back

Manual Attendance

Paper sign-in sheets are slow, easy to lose, and hard to keep accurate.

Time Wastage

Checking people in by hand delays the start of every shift or class.

Buddy Punching

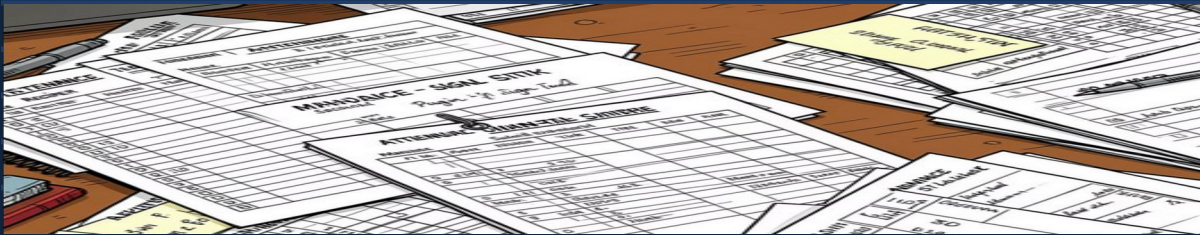

One person can sign in for another, so records don't reflect who really showed up.

No Real Visibility

Managers only see attendance problems after they've already happened.

THE OLD WAY — PAPER ATTENDANCE REGISTER

Illegible entries. Missed sign-ins. No way to verify who was really present.

THE OPPORTUNITY

Why Modern Organizations Are Going Digital

Forward-looking organizations are replacing manual processes with connected, automated cloud-based systems; and seeing the results immediately.

- ✓ Improved Productivity
- ✓ Better Accountability
- ✓ Real-Time Reporting
- ✓ Cloud Accessibility

OUR SOLUTION

One Simple Journey, From Face Scan to Dashboard

An Integrated Attendance Intelligence Platform

Every step happens automatically — a person walks up, their identity is confirmed two ways, and the record appears on your dashboard in seconds.

HOW IT WORKS

Four Steps. A Few Seconds. Done.

STEP 1

Walk Up

The user simply approaches the device; no button to press.

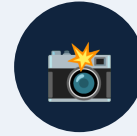

STEP 2

RFID

The user flashes their contactless card.

STEP 3

Face Verified

The camera detects and confirms the person's identity in real time, for a second layer of confirmation.

STEP 4

Synced to Cloud/Synced to Admin Phone

Attendance is logged instantly and appears on the dashboard.

A professional employee uses the facial-recognition terminal each morning; the whole process takes under three seconds.

KEY FEATURES

Everything You Need, Built In

RFID Recognition

A fast automation using contactless cards

Face Detection

Recognizes people automatically as they arrive.
A fast second check using face detection

Cloud Synchronization

Records update everywhere, instantly

Analytics Dashboard

See attendance trends at a glance

Report Generation

One-click reports for payroll or HR

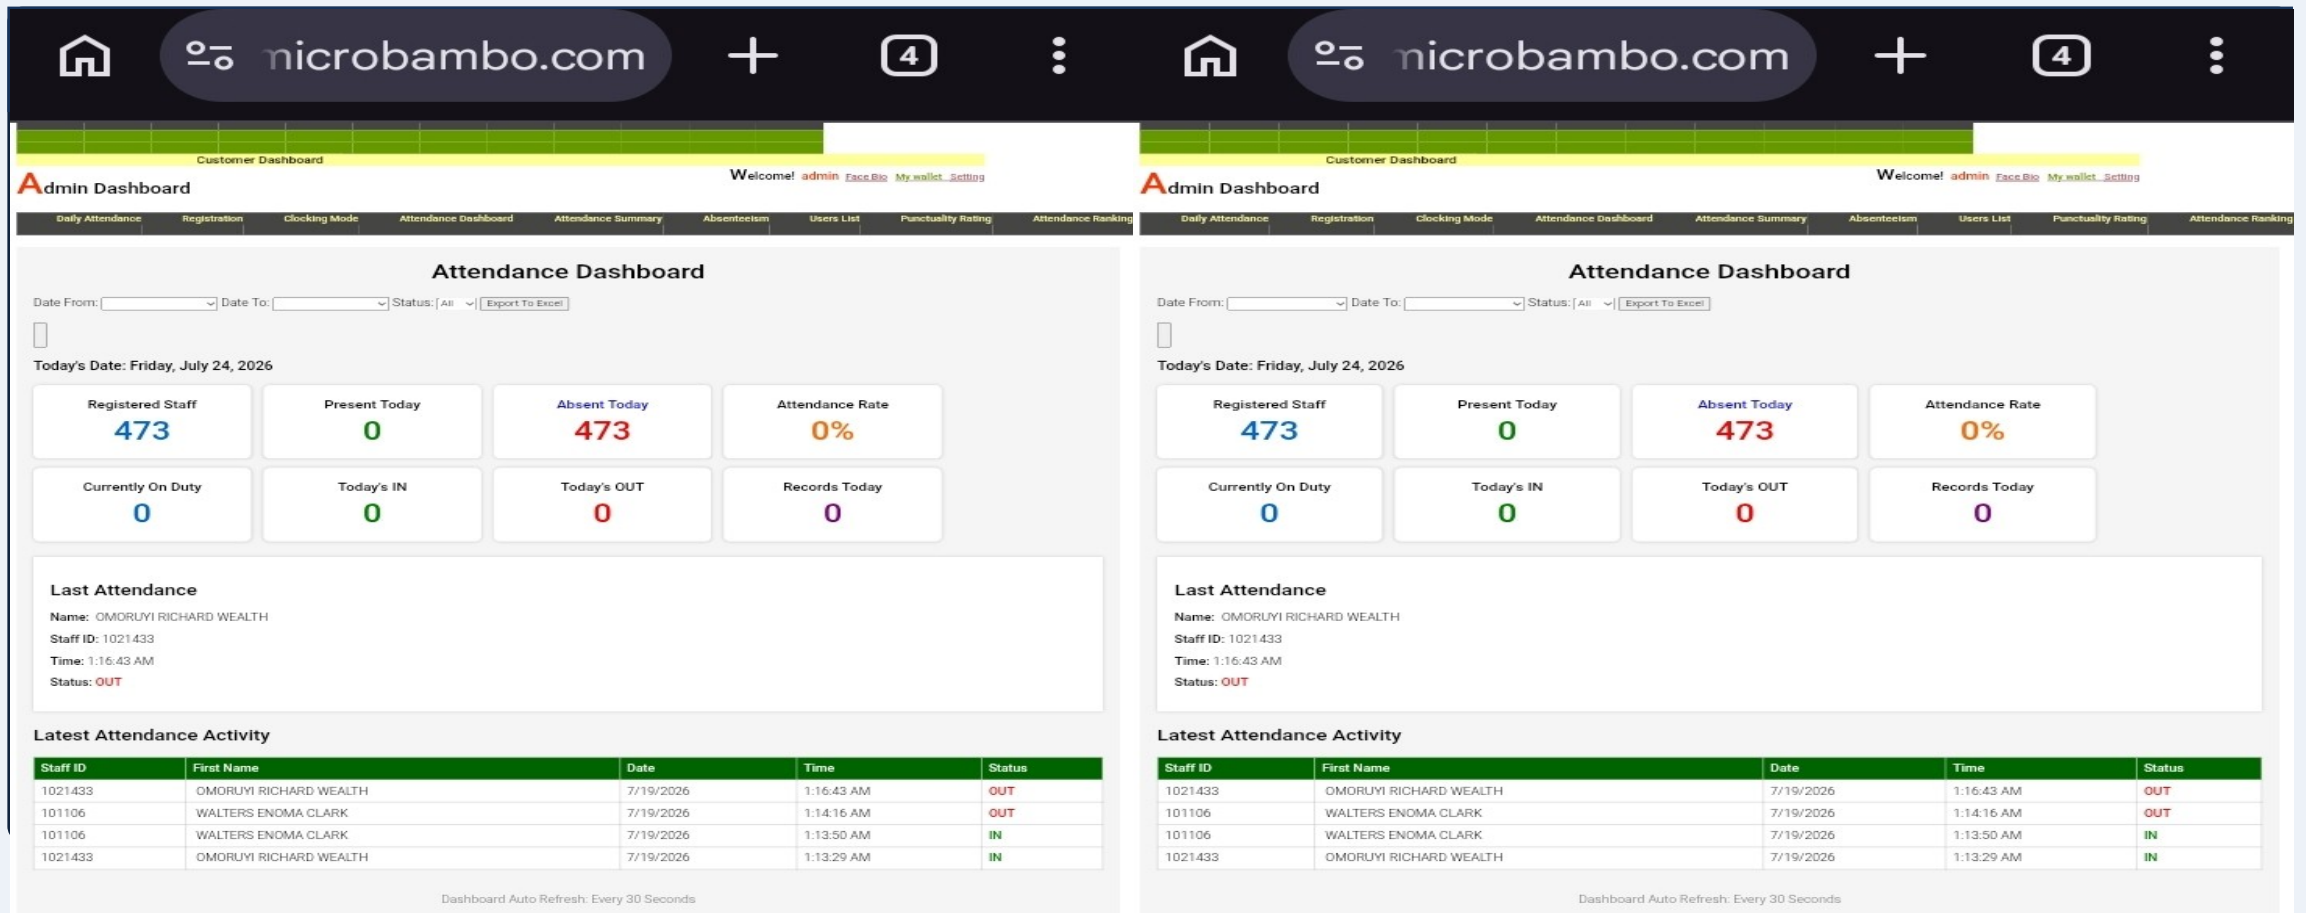

Secure Access Control

Only verified people are logged in

Real-Time Attendance Dashboard

A centralized platform providing real-time workforce visibility, attendance monitoring, and performance analytics.

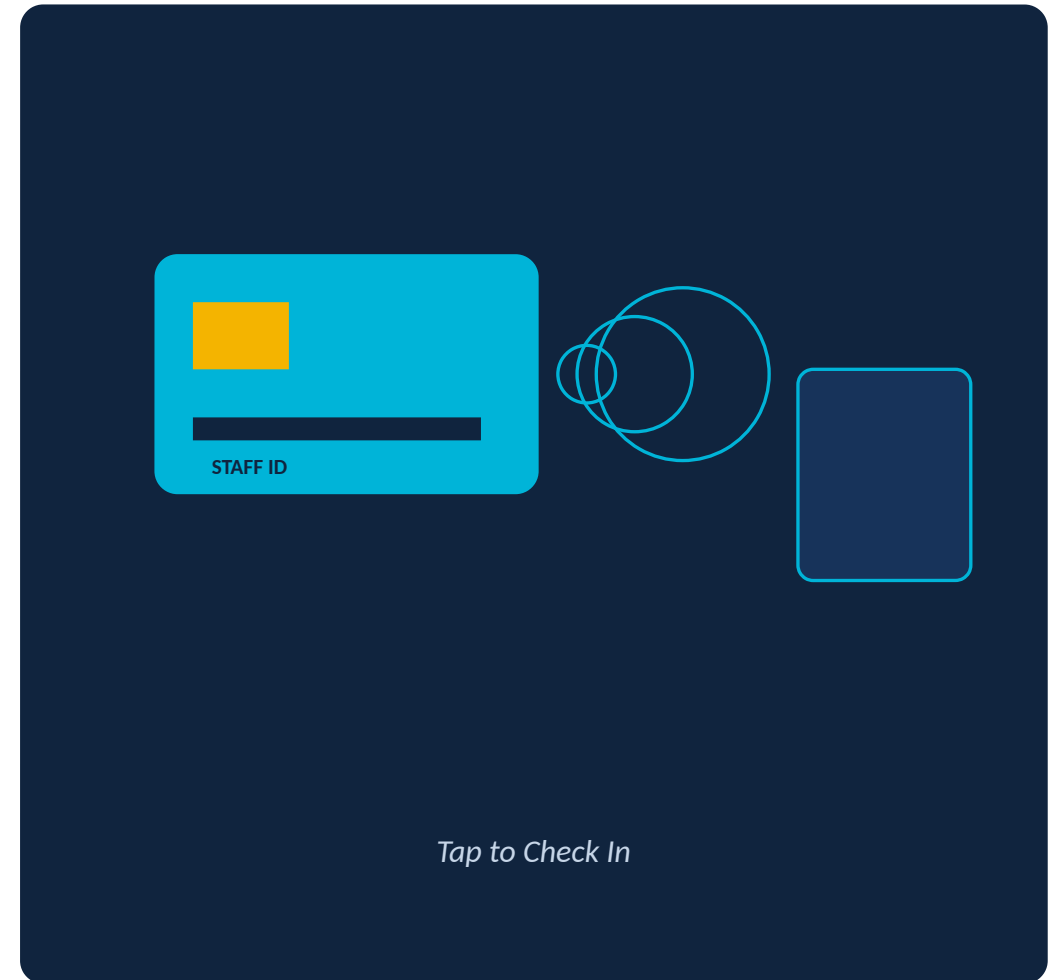

RFID Card Recognition

Users can present their contactless cards for fast and reliable attendance recording.

BENEFITS

- ✓ Contactless Operation
- ✓ Faster Authentication
- ✓ Improved Efficiency

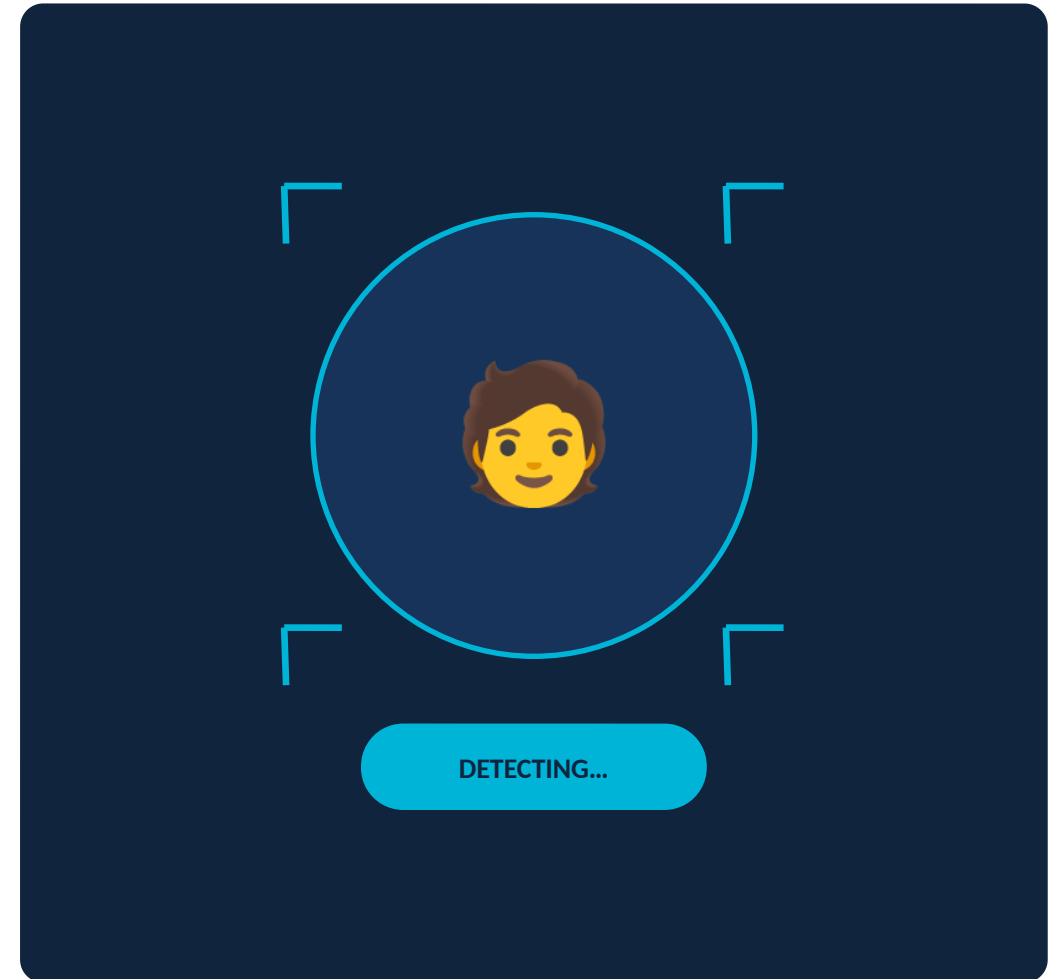

Intelligent Face Detection

The system automatically detects users approaching the terminal and prepares them for verification.

BENEFITS

- ✓ Contactless Experience
- ✓ Fast Detection
- ✓ Enhanced User Convenience

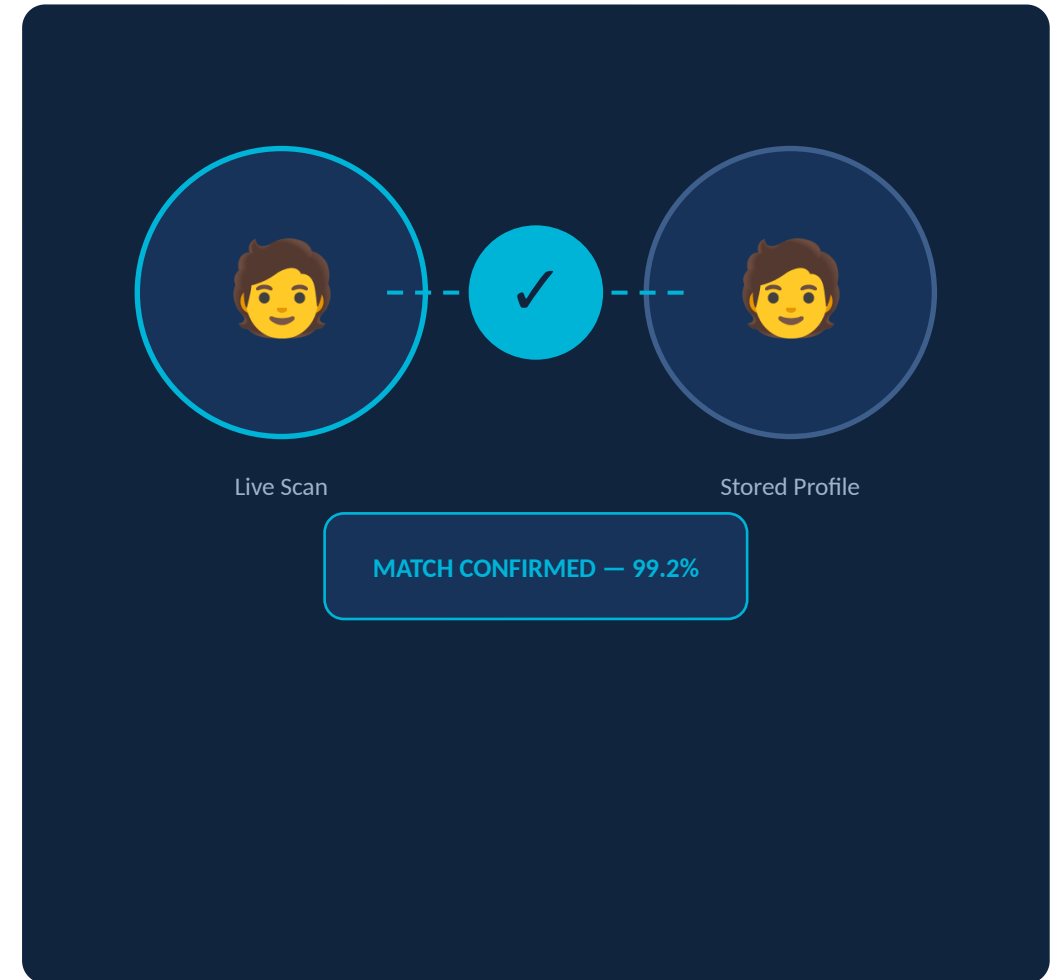

Secure Face Verification

Facial verification ensures that only authorized users can successfully record attendance.

BENEFITS

- ✓ Prevents Identity Fraud
- ✓ Improves Security
- ✓ Increases Accountability

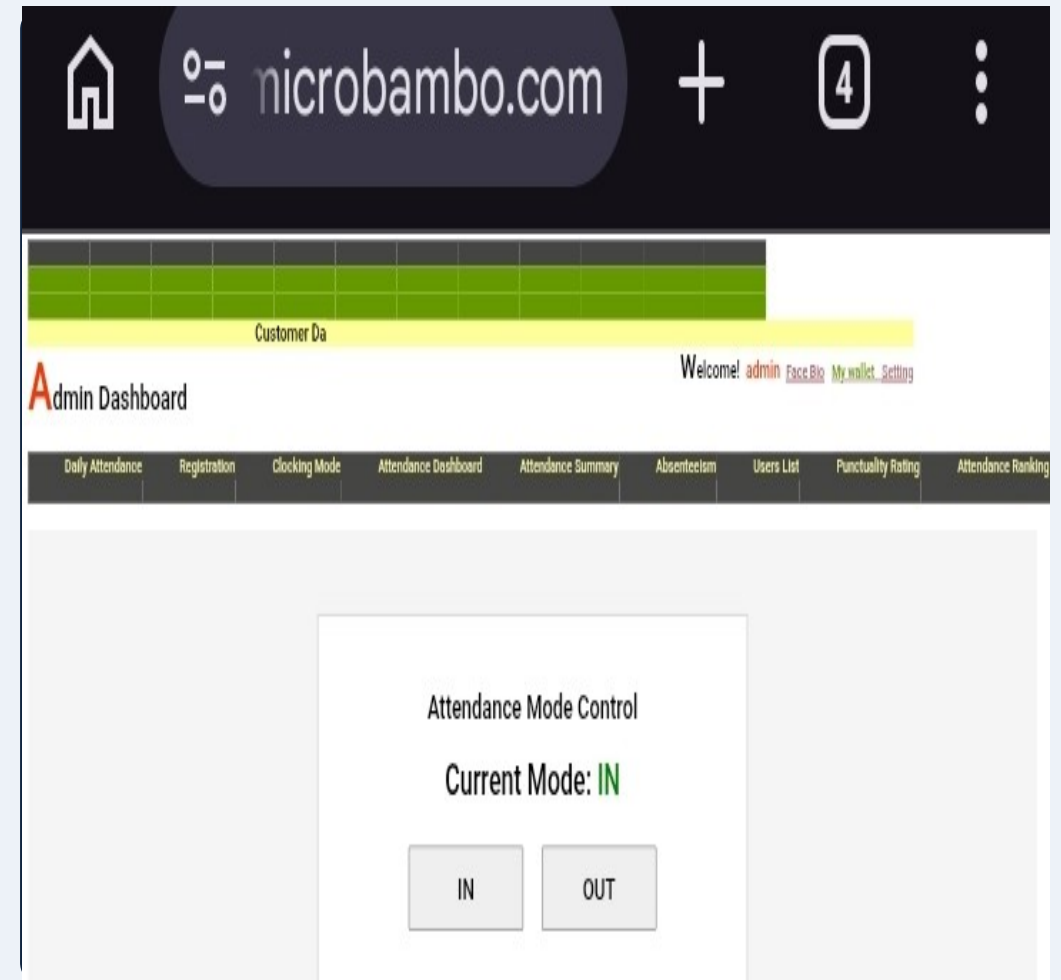

Clock-In and Clock-Out Monitoring

Automatically records entry and exit times to provide accurate attendance history.

BENEFITS

- ✓ User ID/Name Captured
- ✓ Date & Time Logged
- ✓ IN / OUT Status Tracked

Attendance Reports and Analytics

Generate daily, weekly, and monthly attendance reports for better workforce management.

BENEFITS

- ✓ One-Click Report Generation
- ✓ Custom Date Ranges
- ✓ Export in Multiple Formats
